

KRUTI RAY

Dallas, TX (Open to Relocate) | +1 (682) 344-1692 | raykruti08@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Business and Data Analyst with 6+ years across consumer banking, financial services, and higher education, owning requirements from elicitation through UAT and release readiness. Authors BRDs, FRDs, user stories, and RTM traceability while analyzing 500K+ record datasets in SQL, Python, and Excel to expose data quality gaps and bottlenecks. Builds Power BI and Tableau reporting on DAX and Power Query models that replaces manual executive cycles and automates recurring operational reporting. Partners with operations, risk, compliance, product owners, and QA in Agile/Scrum delivery on governance reporting and data validation.

SKILLS

Business Analysis: Requirements Elicitation, BRD, FRD, User Stories, Acceptance Criteria, Requirements Traceability Matrix (RTM), Gap Analysis, AS-IS and TO-BE Process Mapping, Business Rules, JAD Sessions, Stakeholder Analysis, UAT, Defect Triage, SDLC, Agile/Scrum
Data Analytics & Statistics: SQL, MySQL, PostgreSQL, Python (Pandas, NumPy), R, Exploratory Data Analysis, Statistical Analysis, Hypothesis Testing, Regression Analysis, Significance Testing, A/B Testing and Experimentation Design, Cohort Analysis, Customer Segmentation, Trend Analysis, Root Cause Analysis
BI & Data: Power BI, Tableau, DAX, Power Query, Advanced Excel, KPI Definition, Data Profiling, Data Validation, Data Reconciliation, Data Storytelling, ETL and Data Integration, Data Warehousing, Star Schema Modeling, Data Mapping, Data Quality
Tools & Platforms: AWS Redshift, JIRA, Confluence, Microsoft Visio, SharePoint, Microsoft Office, Salesforce CRM, LeadSquared, Sprint Planning, Backlog Refinement
Domain: Consumer Banking, Financial Services Analytics, Banking Analytics, Operational Reporting, Data Governance, AML/KYC Documentation, Audit Readiness, Process Improvement

WORK EXPERIENCE

Business Analyst | KeyBank, Dallas, TX Jun 2025 - Feb 2026

- Elicited business, functional, and technical requirements for consumer banking analytics and workflow modernization, authoring BRDs, FRDs, and RTMs covering 40+ requirements across 6 stakeholder groups.
- Facilitated JAD sessions with operations, risk, analytics, and IT partners, converting outcomes into 60+ JIRA user stories with acceptance criteria and sprint-level sign-off.
- Analyzed customer, transaction, and servicing datasets exceeding 500K records in SQL, isolating data quality gaps and process bottlenecks that shaped 5 prioritized workflow improvements.
- Built 8+ Power BI dashboards on DAX measures and Power Query models for operational KPIs and process monitoring, cutting manual executive reporting effort by 30%.
- Directed UAT across 300+ test cases, validating business rules and reconciliation logic and driving defects to 97% closure before release.
- Standardized governance reporting across 3 banking processes with compliance partners, supporting AML/KYC reviews and audit readiness.

Data Analyst (Graduate Student Associate) | Central Library, University of Texas at Arlington, Arlington, TX Jan 2024 - Aug 2024

- Analyzed 1,200+ student survey responses in Python and SQL, applying Pandas exploratory analysis to identify patterns influencing open educational resource adoption.
- Cleansed, reconciled, and validated data across reporting sources, resolving integration issues that improved reliability of recurring management reporting.
- Performed ad hoc statistical and trend analysis on survey and engagement data, shaping recommendations for program planning.
- Delivered Excel and Python dashboards and presented findings to library leadership, supporting a 15% rise in OER adoption and \$50K+ in funded projects.

Data Analyst | NTT DATA, Bangalore, India Apr 2021 - Aug 2023

- Profiled and reconciled customer, transaction, and operational datasets in SQL, Excel, and Python, resolving duplicate, missing, and mismatched records across source systems.
- Validated source-to-target mappings, transformation rules, and field-level relationships across ETL workflows, confirming outputs matched defined business rules.
- Developed Power BI and Tableau dashboards consolidating multiple source systems into financial and operational KPI views.
- Automated recurring SQL and Excel reporting and validation checks, reducing manual reporting preparation by 35-40%.
- Partnered with product owners, QA, and technical teams in Agile/Scrum delivery, translating reporting requirements into analytical datasets.

Business Analyst | NTT DATA, Bangalore, India Jun 2018 - Mar 2021

- Gathered business, functional, and reporting requirements across financial services workflows, authoring BRDs, FRDs, and user stories.
- Facilitated stakeholder interviews and JAD sessions and ran gap analysis with product owners, developers, and SMEs, producing AS-IS and TO-BE process flows, use cases, and business rules.
- Managed requirements traceability from business requirements through test scenarios and UAT results, improving release readiness.
- Streamlined reporting and operational workflows through process redesign, cutting manual process effort by 25-30% across targeted activities.

PROJECTS & PUBLICATIONS

Retail Sales Performance Data Warehouse and BI Implementation | Tableau, SQL, AWS Redshift, ETL

- Designed a star schema warehouse in AWS Redshift integrating 4 source systems, standardizing daily KPI reporting across 10K+ orders.
- Built Tableau dashboards identifying discount leakage and low-margin regions, reducing ad hoc data preparation by 30%.

Heart Disease Predictive Modeling | Python, scikit-learn, SQL, Tableau

- Built a machine learning pipeline on 1.3M patient records comparing Random Forest, SVM, and Logistic Regression with SQL feature engineering and cross-validation, achieving 92% accuracy.

Behavior Informatics Analytics in Digital Health: Human-AI Decision Behavior | Publication | Zenodo, 2026 | DOI: 10.5281/zenodo.21208730
